

When it comes
to *ANY* drug,
the best mothers
ASK.

Unsure About a Drug? Ask Us.

Any drug you take (pills, alcohol, tobacco) can affect your baby—even in small amounts. That could put your child at risk for serious health conditions. Don't hesitate to ask your doctor about any drug—legal or not. Or call our hotline and talk to someone ready to listen. We're here to help, not to judge. And we can help you—and your baby.
